Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 April 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Receipt is acknowledged of the notice of appeal and appeal brief filed 04/29/2010.

The rejection under 35 USC 103(a) over Schneider et al is withdrawn in view of applicant's remarks.

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

The following rejection is maintained:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims now set out a "synthetic" composition which is not disclosed in the original specification. Preparation of a composition as recited at page 6, line 20 is not adequate support, since even natural compositions such as those used in bone growth, must first treat the natural composition to isolate the desired product. As such, this is considered new matter. Correction is requested.

Response to Arguments

Applicant's arguments filed 04/29/2010 have been fully considered but they are not persuasive.

Applicant argues that the examiner has the initial burden of showing why a person skilled in the art would not recognize in an applicant's disclosure of the invention defined by the claims. This examiner agrees. Applicant states that "any processing of a natural material would render it "synthetic". Further, the method of preparation at page 6 of the specification is used as support of this. However, it is noted that the isolated product of Schneider et al further adds "adhesive molecules and potent endothelial cell growth factors", and is grown on PTFE coated with fibronectin as opposed to endothelial cells seeded directly on PTFE (see Abstract and page 654, first column, second paragraph). As such, the product of Schneider et al would also fall into applicant's definition of "synthetic", yet applicant agrees that this is a "natural" product.

Nothing in the original specification even hints at the term "synthetic". Applicant is looking for support from documents which were not incorporated by reference in the original specification to support the contention that a natural product contains at most 6% heparan sulfate. Nothing in the original specification makes this statement, nor would lead the ordinary practitioner to clearly recognize that the claimed invention is "synthetic" without this background guidance. As such, the rejection under 35 USC 112, first paragraph, is maintained.

Conclusion

No claims are allowed. Cancellation of the term "synthetic" would place the application in condition for allowance.
